

My name is Ngozi Stephenie Ofuani.

MY MANIFESTO

As an aspiring BME officer, I hope to use this position to better represent the Black and minority ethnic community as a whole. To achieve this, I plan to create a platform whereby people that identify with this group can discuss or raise any issues they may have faced within the educational contexts. Being a part of the black and minority ethnic group, I share an understanding of the struggles faced of feeling underrepresented and not taken seriously. I hope to use my position to serve as a voice to the people and represent their needs.

I will ensure to get regular updates and feedbacks concerning the wellbeing of the BME community like the ACS group. I will address and enlighten some important issues which may not be given much attention to. I will be open to working with the students' union to raising ideas to improve the experiences for the BME students.

My role as the BME officer will center on:

Creating awareness and more enlightenment on mental health.

Create a network whereby several BME societies can encourage and support

Tackling any form of inequality to ensure everyone is having an enjoyable experience at the university.
